

# Firearms safety training - Euston

Western Local Land Services has engaged a Registered Training Organisation to deliver firearms safety training for landholders in the Euston area, as part of the Mallee Birds Community Project.

The training will cover:

- general principles of firearms safety
- humane destruction of livestock
- pest animal control and how it helps protect Mallee birds and other native plants and animals
- an opportunity to practice firearms skills in a safe, supervised environment
- licence certification for adults and minors.

You do not need a firearms licence to attend the training. If you're unlicensed, you will complete the firearms licence safety test on the day. If you pass, you'll be emailed a certificate, which can be used when applying for a firearms licence.
